Bud recently inspected both the interior and the exterior of our home and did an excellent job. He is extremely thorough and deliberate in his approach, which we really appreciated. His detailed report was easy to understand and provided us specifics that we can then share with our plumber, electrician, and handyman as we systemically take care of the items he told us need to be addressed.

My wife and I recently purchased our first home and used A-1 Quality Home Inspections to help inform our decision. We found Bud to be a consummate professional who helped us through the entire process. Bud's knowledge was evident in the thorough attention to detail he provided throughout. As first time home buyers we learned a lot in the time we spent with Bud going through our house, he definitely went the extra mile to make sure we knew everything we could before making a purchase. I would recommend A-1 Quality Home Inspections to anyone I know who is planning on purchasing a home.

I am a real estate broker in Colorado and I have used Bud and A-1 Quality Home Inspections, Inc., for most of my buyers' inspections for over 3 years now. He is extremely conscientious, careful, and caring with all of my clients, and he is also very fair both with his pricing and also his evaluations. I would highly recommend anyone who needs a good inspector/inspection use the services of Bud and his company.

Bud. Thank you so much for inspecting my first home. I sleep good at night knowing that someone with your experience and integrity evaluated my home before I made the purchase. I will keep your number handy for future investment purchases as well. Thank you again Melinda

As a general contractor that performs everything from small repairs to full remodels, our company has had a number of occasions to use A-1 Quality Home Inspections, and find them to be an excellent business partner, as well as a quality service provider to many of our clients. Bud has frequently referred his inspection clients to our company to remediate issues he's discovered during his home inspections; in these cases we've found that he has done an excellent job of identifying important issues with the property...issues which need immediate resolution. In the past, we've noticed that some other inspectors seem to stuff their inspection reports chock full of dozens of trivial points (more opinions and observations than issues that truly need remediation), and these tend to dilute the client's need to focus on the bigger issues that do need remediation. In contrast, Bud does an excellent job of clearly delineating the major issues from everything else that he decides to include in his reports, making his reports more understandable and easily actionable. On the flip side, we have referred OUR clients needing inspections to Bud and A-1, and those clients have all been very satisfied -- both with Bud's professionalism and with the detailed nature and usability of his reports. A-1 has been a valued business partner to us, and we highly recommend them to anyone seeking a very seasoned inspector with decades of experience in all aspects of the construction industry.

I was lucky enough to meet Bud Monk at a West Chamber event in early 2014, and have found him to be a man of his word. I appreciate continued support and collaboration with him on a continued basis, and would commend him to anybody interested in protecting their future investment in a home.
